Career Objective:-

A motivated individual with in-depth knowledge of languages and development tools, seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my own skills.

Educational Qualification:-

- I have completed S.S.C. (10th) from Gujarat Secondary Education Board in year 2014 with 86%.
- I have completed H.S.C. (12th) in Science from Gujarat Secondary Education Board in year 2016 with 82 % (P.C.M.). The main subjects I studied were Physics, Chemistry and Mathematics.
- I did my 10th and 12th at Saint Xavier's High School, Located in Adipur, Kutch, Gujarat.
- I am pursuing Bachelors in Engineering in Computer Field from L.J Institute of Engineering and Technology which is affiliated with Gujarat Technological University, situated in Ahmedabad. Currently, I am in fourth year (7th Semester) and will complete my B.E. degree in year 2020. My Cumulative Performance Index is 8.91 and Cumulative Grade Point Average is 8.90.

Technical Skills:-

- Familiar with basic softwares like MS- Office, Word & Excel, Power Point etc.
- Languages Familiar: - C, C++, JAVA, Advance Java, Dot Net Technology, python, JavaScript, JQuery Framework, PHP, MySQL.

Work Experience:-

- I did an internship at Concetto Labs for three months in my third year, there I did a project named Pro Video Book, which has many exciting features like a separate section for kids where the videos were precisely filtered. Furthermore, there was a download option where the user can download any video in any format. Thus, I completed this project successfully and I got the opportunity to work with some great employees and I learned new things as many as possible during this small tenure. By this, I got company exposure and also an experience which would be very much helpful in my future.

Projects:-

YouTube Pro :-

- In the third year, I made a project named YouTube Pro, as a part of the Design Engineering project. The project was just an update of the conventional youtube system. Here the new feature that we provided was download and convert option, where the user can download and can convert the video format in any format. The project was implemented as a web-application and in this, we had used various Front End as well as Backend Development languages such as PHP, MYSQL, etc.

TORP (Traffic Offence Reporting and Payment) :-

- Currently, I am working in the project named TORP, which would be my final year project. We are planning to implement this project and would like to help the city traffic and citizens with our project which will have amazing features. In this system, citizens can view their memos online, can get towing information, policemen can issue memo directly from their allocated handset. Thus this system will provide a transparent system.
